

"The Problematic Challenge" in Economic Nationalism

For those who like to use "problematic" & "presumptive" & "editorial opinions" "hate speech laws" ;

Concerning corresponding attacks against or pro-active initiatives for :

People with morals, ethics, intelligence and awareness, family values, faith, family, freedom and free enterprise, nationalists, patriots, nation builders, individuals, entrepreneurs, enterprise and industry, people with a conscience, integrity, true values, family values, economic development, personal defence, civil defence, national defence and industrial economic enterprise defence;

- The "problematic war against industry and enterprise" We do not count on the government, to end this war, as far as we know, there is nobody talking about or doing anything about "Made in Canada" or the 95% of stuff in stores made somewhere else, or that entire industries have been wiped out, companies shut down and liquidated, people out of work. This includes "currency warfare" "sovereign governments, entities, enterprise and funds versus private enterprise," it also includes the treasonous and genocidal trade deals of Canada, with total sociopathic zero conscience and zero guilt towards Canadian industry and enterprise.
- The "problematic financial institutions" typically, banks and related financial institutions are not interested in "private enterprise" and more interested in gambling in the stock market, extracting wealth from rural communities and directed to big city expensive lifestyle. New companies, and having credit by mainly personal credit ratings and non separations of personal assets to business asset also cause problems.
- The "problematic credit bureaus" "Foreign controlled" or so-called "domestic controlled" with zero accountability and hard to fix "in-accuracies" represent a real national security, industrial, enterprise and personal security threat and causes an astronomical number of problems for people, and enterprise looking for financing, even basic credit cards, and good luck with business credit cards.
- The "problematic official narrative social credit status" Evidently, the public companies with Dunn & Bradstreet ratings and corresponding stock market gambling casino don't have a problem with credit, except now, with changes of "foreign agendas" "environmentalism" "ESG multi-cultural, cultural marxist, anti fossil fuel industry warfare, those enterprise not aligned with globalism, liberalism, the climate change hoax and super imposed over control, may have their "credit" adjusted, as in "non-existent" including related banking, investment and financial services.

- The "problematic Bank of Canada and debt created money, not debt free national currency";
- The "problematic war against the family victim" divorce, separation, alimony, estate tax, inheritance tax, excess property tax in conflict with the "Magna Carta" the liberal fascist homo-fascist legal system, the war against the straight white male, the Human Rights Tribunal, custody battles and awards, "cultural marxist" "education system", "mass media".

■ The "problematic super imposed foreign over-control" in addition to other ESG, (environment, social, governance) foreign agendas, globalism, cultural marxism, and anti nation state official narratives of globalism, environmentalism and anti straight white, with corresponding holier than thou virtue signalling of "inclusion" and "diversity" are actually increased aggression, hate and systemic racism and genocide against white people, in particular the founding people of Canada, and the pre-existing people. Local government is more relevant and accountable to citizens, local residents, enterprise and industry and even they can cause serious problems to the citizen and enterprise or be an asset and ally.

■ Federal, provincial, county and municipal governments that are not nationalist, and may be engaged in various degrees of "liberalism" "communism" "globalism" "selling out the country" "looking after their "in style group" who may also be engaged in crime, treason, genocide, war, immorality, debt and are anti-nation state. This also includes the war against the family, industry and enterprise, related ZOG, post modernism, acts of aggression, bio-terrorism, genocide, weaponized anything and making life difficult

■ The "problematic mass media" "problematic big tech" and the corresponding "ownership, control, voting, editing and censoring" are all elements against real Canadian free enterprise, industry vitality and nation state sovereignty, with rampant liberalism, globalism, cultural marxism etc, system racism against "whitey";

■ The "problematic foreign ownership and control" of industry and enterprise may cause problems, challenges and threats to national security, industrial and enterprise defence;

The "problematic war against the bourgeoisie" by systemic racism and genocide by government, banks, mass media, "agendas" "Protocols" and corresponding "Acts of Aggression" and "Wars of Aggression", including "collaborateurs" to eliminate the competition, free enterprise, "real national security assets";

■ Nation state sovereignty requires a Made in Canada industrial economic and enterprise infrastructure, along with a nationalist real Canadian mass media, and people in government loyal to Canada and value Made in Canada.

■ The 95% of products in stores that are made in China is systemic racism and industrial genocide against Made in Canada and race genocide against real Canadians. A government of imbeciles and traitors, globalism and treason is the great problematic challenge.

Evidently the list is not complete and may take a while...please look at useful websites like: <https://eurocanadians.ca> or <https://canucklaw.ca> learn a few things, get some perspective and awareness, most of all get to work and make progress.

If you look and analyze that from a multiple asymmetrical war vector scenario, you will notice the enemy is comprehensive, dedicated and ruthless. However, not to worry, problems are temporary, and tackling problematic issues is a pro-active endeavour for those with moral courage, audacity, confidence, effort and faith. Since faith without works is dead, we need to get working and prove our resolve and exercise power on earth as it is in heaven.

The good news is you may have God and the Cosmic Joker card if you are on the right side, and even though the universe is a really huge place and we are not running it, we still need to express the best of who we are. If you figure out who the Cosmic Joker is, you may realize that he can supersede any other card in the deck, and play multiple decks.

If all you need to do is Join Battlegroup 301 Inc. you would evidently believe that many hands make light work and you will have secured strategic, tactical and operational advantage, saved your country and be pro-active in working out your own salvation and nation state sovereignty. In Canada we have various organizations called, Ministry of _____. This can be revitalized to a much greater standard of ethics, integrity and nation building, it will require good people with character and courage, a fortitude and resolution, strength and confidence, tenacity and perseverance, humbleness and good will, standing on guard for Canada will take on a whole new meaning, something with heart and soul, something that requires making real measurable progress towards a more revitalized country and citizens with purpose and identity.

If you look at the idea of God's will, "Above all things I wish that you may prosper and be in health" this is the peace, order and good government ideal, we would not be engaged in the devils will, or the goblins will or zog of crime, treason, genocide, immorality, debt, disease or liberalism, socialism, communism, global internationalism, super imposed anti nation state destructive policies, agendas, protocols or other organizations, entities and persons involved in that.

The magnitude of challenge and opportunity now and into the future is fantastic, and here we have this endeavour organized for you, because if you don't organize yourself, someone else might, and you may not like it. So how to keep it simple? Made in Canada, Nation State Sovereignty, Economic Nationalism, Pro-active, Unified, Visionary, transform thought into reality, the alternate reality creation engine with gears and a throttle, custom made for you, the individual, the family and community, you the tribe, the ethno-nationalist, and remember it is more than ok to be who you are, it is awesome to express the best of who you are, offer no apologies, make not excuses, spare no effort, hold back no imagination, keep your dreams alive, revitalize your soul, health, energy and relationships, increase your make it happen competence, develop and be involved in nation building endeavours, succeed with your goals, make a plan and work your plan, succeed at being a super achiever, have some audacity, don't put up with bullshit, don't tolerate acts of aggression and genocide or anything else against you, develop and integrate loyalty, respect, integrity, co-operation and trust, that is essential in everything, make every day count!
